Year 4 Project Homework

Title: Weather Report

This homework has been set from the week beginning 26th October 2026. The homework project is due on Wednesday 11th November 2026.
For this project homework, can you please select one or more activities below and complete them. You will present what you have found out to the rest of your class. Please ask for whatever paper you need from your teacher during the homework project. This homework project is for the whole family to get involved with and we would encourage children to get help completing any of the activities.

Amazing fact challenge! Can you find the wettest country on earth? What is the driest? What is the coldest? What is the hottest?	Make a table of all the different climates you can find in the world.
Write a diary entry as if you were a victim of extreme weather.	Make a cloud using materials found around your home.
Build an Earthquake-Proof Structure. Construct a structure out of drinking straws to see if it can withstand an earthquake.	Make fog in a jar and write instructions for how to complete this experiment.
Make your own rainfall gauge (collector) and test it out. Record the rainfall in your area.	Create a wind map showing the different winds that blow around the world. Show their directions, forces and names on a map.

Free choice: Pick a project of your own to complete. Remember it has to be about the Weather Report.
